

## ABOUT US

We at **IED Quest** ensure our solutions strictly follow the conformance standards and provide true interoperability amongst your DAQ Systems.

Our innovative software and hardware solutions can be tailored as per your project requirements and offer the best in class performance and cost effectiveness.

## SOLUTIONS

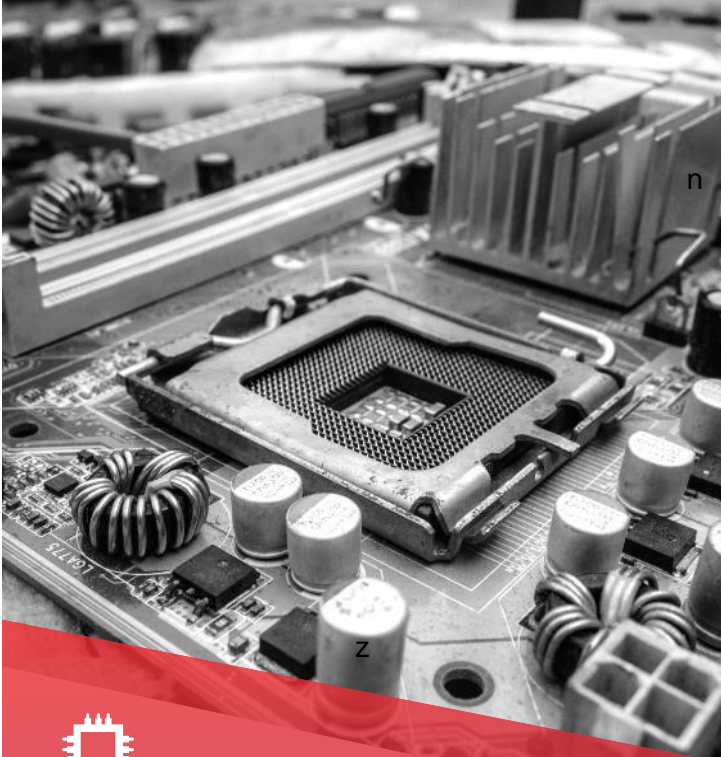

- Power & Energy Automation
- Protocol Converters
- IoT Gateways
- Simulators & Analyzers
- Cloud based Analytics & Monitoring
- RTU, FRTU & DAQ Solutions

## IED QUEST

## IOT GATEWAYS

### Plug-And-Play IoT modules

Our innovative IoT solutions can bring your data to the cloud in just few clicks.

- Based on Microsoft Azure
- Custom web application for monitoring
- Modbus / IEC protocols to MQTT & AMQP
- Cost effective

## PROTOCOL CONVERTERS AND SIMULATORS

### Decoding Energy Automation Protocols

Bring all IEDs under a single monitoring umbrella no matter the protocols they support.

- Convert between different protocols
- Simulate virtual IEDs
- Analyze and test your systems

*“Where smart hardware meets smarter software”*

## AUTOMATED METER READING

### MODBUS/DLMS/MMS based AMR

Fast and reliable meter reading solutions that can capture electrical meter data into the desired format that could be inside an MDAS/Database/SCADA/Custom interfaces.
